

DEKEL BONEH

Software and Information Systems Engineering student at
Ben-Gurion University

Strong academic performance with top grades in core technical subjects:

Object Oriented Programming in Java (93), Advanced Programming in C/C++ (90), Data Structures (92).

(Expected graduation: January 2028).

Integrates AI-driven workflows to accelerate technical problem-solving and enhance system architecture.

Currently gaining hands on experience in modern **web development using JavaScript and Express.js, including CRUD operations, HTTP based APIs, user authentication, and full-stack web architecture principles.**

Experience in building websites on the Wix platform.

WORK EXPERIENCE

Software Developer at Dynamacs (2024)

Developed Python based backend solutions in an early stage startup environment. Worked with REST APIs, Postman, and JSON data processing while contributing to scalable and maintainable backend workflows. Collaborated in a fast paced setting that required quick learning, independent problem solving, and strong ownership over assigned tasks.

Technical Content & Visual Learning Creator at Ben-Gurion University IT Department (2024-2025)

Developed a full animated course on the cluster system for the university, transforming technical IT and infrastructure concepts into structured and engaging learning content. Combined technical research, visual communication, and user focused thinking to simplify complex system topics for large scale student learning.

QA Verification Engineer at Philips Health Systems (2020-2022)

Performed verification for complex medical hardware software systems across multiple domains including GUI, performance, and operational flows. Worked closely with global teams to investigate issues, validate system behavior against requirements, and maintain high quality standards in production oriented environments. Also contributed to reducing team knowledge gaps through clear technical documentation and knowledge sharing.

INTERNATIONAL EXPERIENCE

Exchange Semester - Faculty of Computer Science, Universität Innsbruck, Austria

2025-2026

- Completed advanced coursework in Distributed Systems and Information Security & Privacy
- Adapted quickly to a new academic framework and international standards
- Operated in a multilingual environment - began learning German while maintaining fluent communication in English and Spanish
- Built international academic and professional connections

MILITARY SERVICE

Senior Field Technician, 8200 Intelligent Corps

2017 - 2019

Led high significance large scale projects while dealing with encrypted classified material on a daily basis.

In addition, provided immediate solutions to real time field issues as we established several data transmission sites throughout the country while integrating different data transmission standards

LANGUAGES

- Hebrew : Native
- English: Fluent
- Spanish: Intermediate
- German: Basics

EXTRA - ACTIVITIES

COMPETITIVE FLOOR GYMNAST

2008 - 2019

Daily practice, intense athlete training and determination to succeed.

Summer Camp Counselor at The Jewish Agency, 2021
Pennsylvania, USA
