

DEKEL BONEH

Software and Information Systems Engineering student
at Ben-Gurion University

Strong academic performance with top grades in core subjects: Object-Oriented Software Development (93 - OOP focus), Advanced Programming Topics (90 - C / C++), Data Structures (92), and Information Systems Fundamentals (92).
Expected graduation: June 2027 (3+ semesters remaining)

INTERNATIONAL EXPERIENCE

Exchange Semester - Faculty of Computer Science, Universität Innsbruck, Austria

2025-2026

- Completed advanced coursework in Distributed Systems and Information Security & Privacy
- Adapted quickly to a new academic framework and international standards
- Operated in a multilingual environment - began learning German while maintaining fluent communication in English and Spanish
- Built international academic and professional connections

WORK EXPERIENCE

Software Developer at Dynamacs (2024)

Developed Python-based solutions within an early-stage startup environment, focusing on Object-Oriented methodologies to optimize system interactions. Worked extensively with REST APIs and JSON data structures to ensure robust communication between software components, applying rigorous debugging and validation logic to complex data flows.

Animated Video Creator at IT Department of Ben-Gurion University (2024 - 2025)

Developed technical animated tutorials for a new course on Clusters, effectively simplifying complex architectural and distributed systems concepts for the university's Moodle platform. Utilized visual tools to break down high-level hardware-software interactions, ensuring technical materials were accessible and engaging.

QA Verification Engineer at Philips Health Systems (2020 - 2022)

Specialized in the verification of complex PET-CT hardware-software systems, self-learning intricate system operations and working with radioactive materials. Performed rigorous test execution and design across performance and GUI domains, acting as a quality gatekeeper to ensure system correctness and reliability while collaborating with global engineering teams to bridge technical knowledge gaps.

MILITARY SERVICE

Senior Field Technician, 8200 Intelligent Corps

2017 - 2019

Led high significance large scale projects while dealing with encrypted classified material on a daily basis. In addition, provided immediate solutions to real time field issues as we established several data transmission sites throughout the country while integrating different data transmission standards

LANGUAGES

- Hebrew : Native
- English: Fluent
- Spanish: Intermediate
- German: Basics

EXTRA-ACTIVITIES

COMPETITIVE FLOOR GYMNAST

2008 - 2019

Daily practice, intense athlete training and determination to succeed.

Summer Camp Counselor at The Jewish Agency, 2021
Pennsylvania, USA
