

DEKEL BONEH

Software and Information Systems Engineering student
at Ben-Gurion University

Strong academic performance with top grades in core subjects: Object-Oriented Software Development (93), Advanced Programming Topics (90 - C/C++ focus), Data Structures (92), and Information Systems Fundamentals (92). Basic knowledge of CPU architecture. **Expected graduation: June 2027 (3+ semesters remaining).**

INTERNATIONAL EXPERIENCE

Exchange Semester - Faculty of Computer Science, Universität Innsbruck, Austria

2025-2026

- Completed advanced coursework in Distributed Systems and Information Security & Privacy
- Adapted quickly to a new academic framework and international standards
- Operated in a multilingual environment - began learning German while maintaining fluent communication in English and Spanish
- Built international academic and professional connections

WORK EXPERIENCE

Software Developer at Dynamacs (2024)

Developed Python-based tools and backend solutions, utilizing REST APIs and Postman to validate system responses and debug complex software issues. Focused on processing JSON data into structured Python formats, ensuring high-quality tool development and data integrity within a fast-paced startup environment.

Animated Video Creator at IT Department of Ben-Gurion University (2024 - 2025)

Created animated educational content for a new course on Clusters, gaining exposure to advanced system architectures and internal configurations. Translated technical specifications into clear, visual tutorials, supporting the university's platform in teaching complex system-level logic and large-scale development concepts.

QA Verification Engineer at Philips Health Systems (2020 - 2022)

Served as a Verification Engineer for high-end medical systems, acting as a quality gatekeeper by verifying system tests and aligning defects with customer requirements. Performed comprehensive test reviews and designs for various system modes and GUI components, collaborating globally to ensure that architectural standards and validation methodologies were strictly maintained.

MILITARY SERVICE

Senior Field Technician, 8200 Intelligent Corps

2017 - 2019

Led high significance large scale projects while dealing with encrypted classified material on a daily basis. In addition, provided immediate solutions to real time field issues as we established several data transmission sites throughout the country while integrating different data transmission standards

LANGUAGES

- Hebrew : Native
- English: Fluent
- Spanish: Intermediate
- German: Basics

EXTRA - ACTIVITIES

COMPETITIVE FLOOR GYMNAST

2008 - 2019

Daily practice, intense athlete training and determination to succeed.

Summer Camp Counselor at The Jewish Agency, 2021
Pennsylvania, USA
